

The Rumanian Minister of Foreign Trade, Mr. Constantin Pirvutoiu, announced that till the end of 1989, Rumania will completely pay off its assets.

The credits obtained during the 23 light years of the Ceausescu Age, has been used for realization of the programmes of the forced and irrational industrialization of the country, for the building of the Danube-Black Sea Channel, for the destruction of Bucharest, for the building of a Presidential Palace, for the realization of the demential plans concerning the demolition of the villages and the peasants internment into agro-industrial centers while in hospitals new born babies die in incubators because of the economization of the electric current and people over 65 years are declined the medical assistance.

The paying off the debts made by the Rumanian Communist King, forced the population not to live, but to survive in Rumania's multilaterally developed misery.

Woeful victory of the Conducator over the people !

The price of the German ethnics has been raised by the President with Royal Sceptre from 8 to 11 thousand D. Marks per capite and upsetting is the fact that the West German State agrees to continue the trading in human beings.

The moment has come when the West realizes the fact that the false champion of liberty and independence towards Moscow of the seventies, does use that money only for the effectuation of his pathological megalomaniac plans and for the annihilation of Rumania's population.

In the name of those persecuted and terrorized by the Rumanian Security for their political and religious convictions and for the fault of having different mother-tongue from the Rumanian language, of those who suffer of cold and hunger while the Chief of the State keeps travelling around the whole world, we do appeal to the Western countries to cease all kind of support for the ceauscist dictatorship since the debts are repaid from the suffering, desperation and the blood of 23 million human beings.
